

APIS information handling for EasyJet in NetCheck

As from the 13th of November NetCheck users are able to enter APIS (Advance Passenger Information System) Passport information in the passenger data screen for EasyJet (U2).

The screenshot below shows the new fields that may be populated with the passport information.

A screenshot of the Sabre Travel Network NetCheck Booking interface. The browser window title is "Sabre Travel Network, MySabre - Home Page - Microsoft Internet Explorer Provided by Sabre Inc.". The address bar shows "https://my.sabre.com/ps/portal/ins?lang=en". The page is titled "MySabre" and shows "Step 2 of 4" in the "NetCheck | NetCheck Booking" section. The "Passenger Data" form includes fields for "Title", "Last Name", "First Name", "Frequent Flyer Number U2", and "PassPort Number". A yellow callout box with a blue border points to the "PassPort Number" field and contains the text: "NEW: Optional APIS information fields are now visible during the booking." Below the "Passenger Data" section is the "Air Extras" section with fields for "Number Of Bags" and "PassportExpiryDate". The "Estimated Price" section is partially visible at the bottom.
