

March 2008

Baggage Allowance Enhancement

An enhancement to baggage allowance entries is available in Sabre as from 04 March 2008 which provides the following functionality:

The maximum baggage allowance which can be entered is increased for all passengers from the existing 02P to a maximum of 09P (BA*09P). This increase is available to the ticketing entry (W‡), Phase IV (mask), QREX and linear (W ‡ET) exchange transactions. This will allow BSP subscribers to manually input a baggage allowance of up to BA*09P according to the airline's regulations.

In addition, this enhancement allows NIL to be input as a valid baggage allowance in the ticketing entry (W‡), Phase IV (mask), QREX and linear (W ‡ET) exchange transactions for all passenger types. NIL was only permitted as a valid manual baggage allowance for infant (I/) passengers.
