

## Hotel Commission Indicator

Sabre introduces a hotel commission indicator on the Hotel Rate Availability Display (HOD).

Save time and easily identify earning opportunities at a glance with the new Sabre hotel commission indicator for participating hotels in the Hotel Availability response. This means that incentive hunting will soon be a thing of the past since you have instant information about commissions associated with specific rates.

If you would like to look at a display, you can either check for the available hotels at a preferred city (**HOTLON/10SEP-2NT2**) and then display the hotel description (**HOD\*2**) or if you know the hotel's property number you can display the hotel description immediately with the entry **HOD62143/10SEP-2NT2**.

From the hotel description response below you can see the commission indicator "C" which means that rates shown are Commissionable.
