

New Data Retention Policy for Message Queues

We would like to inform you that effective October 1, 2008, Sabre will establish a new retention policy for message queues.

Beginning on October 1, 2008, all messages older than 6 months will automatically purge from the system. Regular scheduled maintenance will continue to enforce this 6 month message retention policy. All users will be affected. If you have operational critical messages older than 6 months, we recommend you take the necessary steps to copy the information to a local device or print the messages.

If you have any questions and /or concerns, please contact our Helpdesk department.
