

➤ New Sabre Air Suite

The *Sabre Air Suite* is our new end-to-end air solution, which includes air content, shopping, pricing and fulfilment capabilities.

The *Sabre Air Suite* offers you new products and enhanced functionality to ensure you can shop, book and fulfil your air needs with accuracy and efficiency.

Shopping and pricing enhancements empower you to meet your clients' demands for advanced shopping and pricing. Improved low fare search capabilities help you provide better customer service to increase the likelihood of closing a sale. The use of automated rules increases accuracy and reduces the likelihood of debit memos. In addition, the Sabre GDS now receives fare content in a more timely and efficient manner to provide you the most current information available.

Fare and Rules Displays, which provide a snapshot of fare content and rule information for fares loaded in the *Sabre* system, have been redesigned in the new suite to better support your fare information needs. In addition, *Sabre MyFares*, a new fare filing solution, is a new product that will help you more efficiently manage your agency-negotiated fares.

You will be able to access these great new products and features once you have been upgraded to the new *Sabre Air* suite. *Sabre Connected* travel agencies will be upgraded to the new *Sabre Air* suite throughout 2006.
