

STARS – Secure Flight Enhancement

As of September 8th, the secure flight enhancement for STARS allows the DOCS, DOCA and DOCO lines to exceed the 56 characters previously permitted. The maximum length of STARS lines are only extended to 255 characters only for the Secure Flight entries. All other types of STAR lines remain with a maximum length of 56 characters.

With this enhancement, when a 3DOC or 4DOC is entered into a STAR as a line type A or O, and the length of the line is greater than 56 characters, then the input line will be broken into multiple but connected lines. The connecting lines will start with 3 slash characters.

Entry:

NAO3DOCSS1/CY/25APR08/CY/SSUBRAMANIANANANAN/MUTTHUSWAMY/BALAKRISHNAN-1.1

Response:

*(entry accepted)

Response before enhancement:

ITM TOO LONG

The line length is calculated starting after the NAO or NAA action code and begins with the first character of the DOC data and includes all spaces, slashes, characters and numerics.

Star Display entry

There will be no change to star display entry format. This section is just to explain how the continued lines will look in a star. Note the 3 slashes on line 10.

```
N*SERAFIGIDOU<
STAR  SERAFIGIDOU
  0S  SERAFIGIDOU DESPO
  1A  922664515-B
  2A  PE†DSERAFIGIDOU@CYPRUSAIR.COM†
  3A  -SERAFIGIDOU/DESPINA MRS
  4A  9221235678-H
  5O  FFCY122345
  6O  3VGML

```

Star insert entry

After this enhancement an entry to insert a line between continued lines will be prohibited.

Entry: NI9O5TESTREMARK

Response: INVALID ACTION ON WRAPPED LINE

9O and 10O are continued lines. So if you try to insert any line between them you will get an error. This is a new error message that has been created for the Secure Flight changes and is the only new error message as a result of this enhancement.

Star delete entry

After this enhancement if you delete the parent line of the continued lines then by default all its continued lines will also be deleted. An attempt to delete only the continued line will be treated as erroneous entry.

Entry: N#10O

Response: INVALID ACTION ON WRAPPED LINE

Since line 10O is a continuation of line 9O it cannot be deleted. Line 10O would need to be deleted as this would also delete line 2A.

Entry: N#9O

Response: * (entry accepted)

Lines 9O and 10O, both, will be deleted.

Star Now Move (NM) entry

There will be no change to star now move entry format. Just that whenever continued lines get moved to the PNR they will be appended to each other to make a single entry. The 3 slash characters will be removed while appending the continued lines to the parent line.

For any additional information please contact our Helpdesk at 22581099.
