

Sabre Releases Key Frequent Flyer Functionality with Lufthansa

Sabre is pleased to announce the implementation of key frequent flyer functionality with Lufthansa. From 15th May, travel agencies globally are able to immediately confirm that the frequent flyer number added to a reservation matches the name of the traveler. Sabre has worked closely with Lufthansa to ensure that our agents can instantly validate that the frequent traveler data they have added is correct. In addition to this, when a frequent flyer number is added, any applicable tier-level is instantly displayed. This ensures that agents can instantly recognize high profile travelers and ensure that most-valued customers can be differentiated as applicable.
